Projects

Miranda - Webpage — Github

- Miranda is a web project inspired by a newspaper, featuring a clean and modern layout with a minimalistic design approach. It replicates the aesthetic of a classic print publication.
- **Key Features:**
    - **Smooth Scrolling:** Implemented using Locomotive.js for a seamless navigation experience.
    - **Round Animation on Load:** A circular animation effect appears when the webpage is opened or reloaded.
- **Tech Stack:** Locomotive.js, HTML, CSS.

Vegan Mart — Github

- Vegan Mart is an e-commerce website for purchasing vegan products. The frontend is fully developed, providing a clean and user-friendly shopping experience.
- **Key Features:**
    - **Add to Cart:** Users can add products to the cart for a seamless shopping experience.
    - **Search Filter:** Allows users to search for specific products and apply filters to refine their choices.
- **Tech Stack:** HTML, CSS, JavaScript.

Pixo - A Visual Content Posting Platform — Render

- Pixo is a full-stack MERN-based website that allows users to log in, create posts, and share them publicly. It features a user-friendly interface with responsive Design.
- **Key Features:**
    - **User Authentication:** Secure login system for users to access their accounts.
    - **Admin Dashboard:** Restricted section where admins can manage and delete posts from any user.
    - **Responsive Design:** The website adapts seamlessly to different screen sizes.
- **Tech Stack:**
  Frontend: React.js, CSS.
  Backend: Node.js, Express.js, MongoDB, Mongoose, JWT Authentication.
  Deployment Version Control: Git, GitHub, Render.
